(Good explanation of how the coag cascade works/its main topics!!)

Which factors are PTT and which are PT?

- **PTT**= you Play Table Tennis Inside= Intrinsic
  - Deficiency of Factor XII, IX, XI, VIII, X, II (prothrombin), V, and I (fibrinogen)
- **PT**= you Play Tennis outside= extrinsic
  - Deficiency of Factor VII, X, V, II (prothrombin) and I (fibrinogen)

\*Factor XIII deficiency will have a normal PTT and PT. There is a specific Factor XIII test to check for this \*
